## Upcoming Web Seminar

What has Cochrane Neonatal done for babies?

Evidence from systematic reviews

Presented by: Dr. Roger Soll

September 29th, 2017

12:00pm Eastern Daylight Time

(New York, GMT-04:00)

To register please click [here](#)

Cochrane Neonatal is pleased to announce the eighteenth in a series of sessions focused on specific Cochrane Reviews and the evidence that they

provide for practice.

The goal of this session is to disseminate findings from Cochrane Neonatal systematic reviews in order to promote the use of evidence-based medicine in neonatal care. We hope that this will be an exciting format for discussion of how these interventions can improve neonatal care.

The webinar is available free to all neonatal physicians, practitioners, nurses, and trainees. It is supported by: The National Institute of Child Health and Human Development & The Vermont Oxford Network.

This activity has been planned and implemented by The Robert Larner College of Medicine at The University of Vermont and Cochrane Neonatal is accredited by the American Nurses Credentialing Center (ANCC), the Accreditation Council for Pharmacy Education (ACPE), and the Accreditation Council for Continuing Medical Education (ACCME), to provide continuing education for the healthcare team.

The University of Vermont designates this web seminar for a maximum of 1 AMA PRA Category 1 Credit(s)<sup>™</sup>. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Please email [Jennifer Spano](#) with any questions.

**Nursing Contact Hours are now available for our Webinars!**

The University of Vermont designates this web seminar for a maximum of 1 Nursing Contact Hour.

## Evidence Round-up

We continue to look for funding and plan for the future, but in the meantime, we are still publishing reviews. Below is our monthly update of new and updated reviews added to our NICHD website.

### New Reviews

[Effects of targeting lower versus higher arterial oxygen saturations on death or disability in preterm infants](#)

[Infant pacifiers for reduction in risk of sudden infant death syndrome](#)

[Routine oro/nasopharyngeal suction versus no suction at birth](#)

[Frenotomy for tongue-tie in newborn infants](#)

[Fluid restriction for treatment of preterm infants with chronic lung disease](#)

[Molecular assays for the diagnosis of sepsis in neonates](#)

[Topical anaesthesia for needle-related pain in newborn infants](#)

### Updated Reviews

[Arginine supplementation for prevention of necrotising enterocolitis in preterm infants](#)

---

[Repeated lumbar or ventricular punctures in newborns with intraventricular haemorrhage](#)

[Long chain polyunsaturated fatty acid supplementation in infants born at term](#)

[Nasal intermittent positive pressure ventilation \(NIPPV\) versus nasal continuous positive airway pressure \(NCPAP\) for preterm neonates after extubation](#)

[Calcium and phosphorus supplementation of human milk for preterm infants](#)

[Neonatal vitamin A supplementation for the prevention of mortality and morbidity in term neonates in low and middle income countries](#)

[Skin-to-skin care for procedural pain in neonates](#)

## Want to See More?

All of our reviews can be viewed on our Cochrane Neonatal [NICHD webpage](#).
